Carbon Reduction Plan

Supplier name: Constructex Limited.

Publication date: January 2024

Commitment to achieving Net Zero

Constructex Limited is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2024	
Additional Details relating to the Baseline Emissions calculations.	
Constructex has not previously assessed or reported emissions and therefore 2024 will be our baseline and our first reporting baseline.	
Constructex operates from a head office and at various sites around the UK. The head office usage of gas (scope 1) and electricity is tracked (scope 2). The fleet emissions are taken into consideration on a milage basis.	
The emissions from sites are difficult to quantify accurately, so a mean daily rate is taken separated into small, medium and large projects. A split of 70/30 is used for the Constructex operations (scope 1) and subcontractor operations (scope 2).	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO2e)
Scope 1	To be assessed throughout 2024
Scope 2	To be assessed throughout 2024
Scope 3 (Included Sources)	To be assessed throughout 2024

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

- We are to develop metrics to allow us to accurately track our carbon usage across the organisation.
- We are to select subcontractors / suppliers who are committed to achieving net zero by 2050.
- We are to continue to improve our facilities and fleet to make the organisation more energy efficient and therefore reduce carbon emissions.
- We are to invest in equipment which reduces our carbon emissions.

We project that carbon emissions will decrease by 4% per annum year-on-year to ensure that we are meeting our target deadline of 2050.

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented at the 20<mark>24</mark> baseline.

• We have incorporated the CRP into our ISO 14001 certified management system. The policies and procedures of Constructex will take this requirement into consideration.

In the future we hope to implement further measures such as:

- Having a fully electric fleet of vehicles.
- Improving our facility to ensure it is energy efficient.
- Plan projects with suitable equivalent materials which have a lower or zero carbon emission.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹

¹<u>https://ghgprotocol.org/corporate-standard</u>

and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

SUL

Huw Evans
